Can I get a drawing of the loading dock?

Who is the building engineer?

Will a 53' tractor trailer fit into the loading dock if the cab and trailer are under 13.5'?

Thanks

Phil

Subject: RE: FW: 999 loading dock

Good afternoon all,

The loading dock height is 13.6 feet and has three bays. Unfortunately, I don't have the length restrictions but the loading dock is actually inside our parking garage and there may be a tight turn into the dock. I would advise a site assessment. There are three bays so two trucks can unload at once.

Please note there are limitations to the delivery hours and they must be coordinated with management at least 48 hours in advance. Deliveries can only be made from 6:00 am – 8:00 am, 9:30 – 11:30 and after 6:00 pm.

Thanks
